# Take Away With A Number Line

Show the whole number with a green dot. Cross off the amount being taken away, then draw that many hops back on the number line. Show where you land with a red dot. The red dot where you land is the answer.
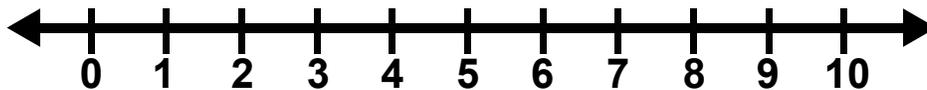

Example: There are 7 baby lions. 3 baby lions go for a walk. How many baby lions are left?

1) There are 5 baby elephants. 3 baby elephants go to the water hole for a drink. How many baby elephants are left?

2) There are 8 kittens playing in the grass. 7 kittens run to their mother. How many kittens are left?

3) There are 10 chicks at the pond. 8 chicks start walking home. How many chicks are left at the pond?
