Lesson 08.05: After Every Night, Comes Day  
Printable Activity: Weather Chart

# Weather Chart

A weather pattern is weather that repeats itself over a period of time. For example, if it is rainy outside for 3 days then you have a rainy weather pattern.

Carmen had three days of rainy weather and couldn't fly her kite! Three days of rain is a weather pattern.

## I Wonder

Will I find patterns in weather over the next 16 days?

## I Predict

Circle the word to complete the sentence.

I think that I ( will / will not ) find patterns in the weather over the next 16 days.

## I Explore

1. Check to see what the weather is like outside.
2. In the "I Record" section, color in one block to show what the weather is like for that day.
3. Repeat steps one and two for 16 days.
4. Share your results with a friend or family member.
5. Answer the questions in the "I Know" section.
